

42GNSSX-XX-X

ARINC 743 footprint multi-frequency GNSS antenna

The 42GNSSX-XX-X is a multi-frequency antenna for assured positioning, navigation and timing (APNT) reception. This wideband antenna operates across GPS, GLONASS, Galileo and BeiDou frequencies for true Global Navigation Satellite System (GNSS) reception.

The baseplate is compatible with ARINC 743 mounting hole and footprint requirements. An O-ring seal between the antenna and your platform ensures easy installation.

The product family is available in passive and active (amplified) configurations. The active circuitry is designed to support a wide range of input voltages with low current consumption. The passive design is ideal for installations where the antenna is located close to the receiver.

Antcom can customize this product family to meet your specific requirements. Please contact us for more information about customization options.

Options

Color

- Gloss white
- Lusterless gray
- Camo green
- Lusterless black
- Desert tan

Connector

- SMA
- TNC
- Type N
- TNC bulkhead

LNA Gain

- 33 dB
- Passive

Benefits

- Standard ARINC 743 mounting footprint for easy installation
- Multi-frequency GNSS coverage for assured PNT

Features

- Maximum multi-frequency, multi-constellation coverage
- ARINC 743 compatible mounting holes and footprint
- Passive or active (amplified) configurations available
- DC power input through RF connector
- Connector options available
- Paint color options available
