

NovAtel® Inc. Announces Firmware Release Version OM7MR0504RN0000 (7.05.04)

January 23, 2019

NovAtel Inc. is pleased to announce the 7.05.04 firmware release for our OEM7 series family of receivers. The following key benefits are now available in the 7.05.04 release:

- Users can achieve a single point position accuracy of 2.5m (RMS) using NavIC L5 signals (from the Indian Regional Navigation Satellite System) with GPS L1 on the newly available JSN model
- Access to the L5 frequencies on the OEM7600 and OEM7720 provides triple frequency capabilities to unlock the potential of GPS L5, Galileo E5a and AltBOC, Beidou B2a and NavIC L5

A full listing of all changes in this release are included in the “What’s New” document included in the firmware download package.
