

# GPS-703-GGG-HV and GPS-703-GGG-HV-N

## **USER GUIDE**

GM-14915130

Rev 2

June 2014

The GPS-703-GGG-HV and GPS-703-GGG-HV-N are active antennas designed to operate at the GPS L1 frequency at 1575.42 MHz, the GPS L2 frequency at 1227.60 MHz, the GPS L5 frequency at 1176.5 MHz, the GLONASS L1 frequencies from 1593 MHz to 1609 MHz, and the GLONASS L2 frequencies from 1238 MHz to 1254 MHz. The Galileo E5a, E5b, and E1 frequencies; BeiDou B1 and B2 frequencies and GLONASS L3 frequencies are also supported. This guide provides the basic information you need to install and begin using your new antenna.

## ADDITIONAL EQUIPMENT REQUIRED

The equipment listed below is required to set up the GPS-703-GGG-HV or GPS-703-GGG-HV-N antenna:

- A mount, such as a range pole, tribrach, or tripod, with a 5/8" x 11 thread that extends between 3/8" and 7/8" (9 mm and 22 mm)
- A 1" open-end wrench
- Coaxial cable with a male TNC connector (N-Type connector for the GPS-703-GGG-HV-N)
- A device with an antenna input port that both receives the RF signal and provides 4.5 18.0 VDC to the antenna. (All NovAtel GNSS receivers provide the necessary power through their antenna RF connectors.)

#### SITE SELECTION GUIDELINES

Before installing the antenna, select a site that as closely as possible meets the following conditions for optimal performance:

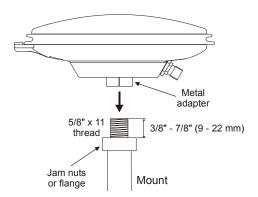

- An unobstructed line-of-sight from horizon to horizon and at all bearings and elevation angles.
- As far as possible from reflective objects, especially those that are above the antenna and any water bodies, which can be a strong source of multipath reflections.
- If obstructions and reflective surfaces are within 30 m, ensure the site is as high as possible. Otherwise, mount the antenna as low as possible.

## **INSTALLING THE ANTENNA**

After a site has been selected, install the antenna as follows.

1. Verify that the thread on the mount does not extend more than 7/8" (22 mm) to ensure the plastic inside the antenna receptacle is not damaged when the mount is inserted. If it extends further than 7/8" (22 mm), add two jam nuts to shorten the exposed thread, ensuring the nuts are well-tightened.

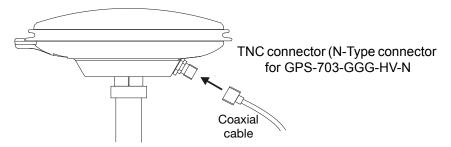

2. Align the mount thread with the metal adapter on the bottom of the antenna and rotate the antenna clockwise until it is securely screwed to the mount. Using a wrench, tighten the adapter to the mount.

The metal adapter on the bottom of the antenna is fixed in place. Do not attempt to remove it.

- 3. Remove the dust cap from the antenna's connector.
- 4. Attach the male connector of the coaxial cable to the antenna's TNC connector. For the GPS-703-GGG-HV-N, attach the male N-Type connector of the coaxial cable to the antenna's N-Type connector.

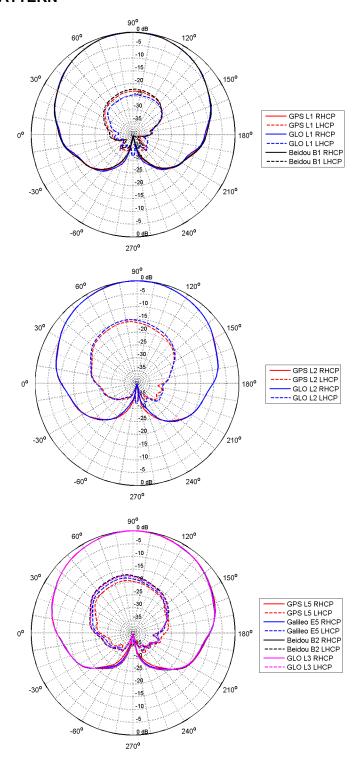

Attach the other end of the coaxial cable to the antenna input port of the receiving device.
The receiving device must provide power as detailed in the SPECIFICATIONS section of this guide. All NovAtel GNSS receivers provide the necessary power through their antenna RF connectors.

## **ANTENNA CARE**

The GPS-703-GGG-HV and GPS-703-GGG-HV-N are designed to withstand the elements, including rain, snow and dust. However, to ensure your antenna performs optimally, keep the radome (the top surface of the antenna) clean and brush off any ice and snow. In addition, ensure the connector remains clean and dry and replace the dust cap when a cable is not connected.

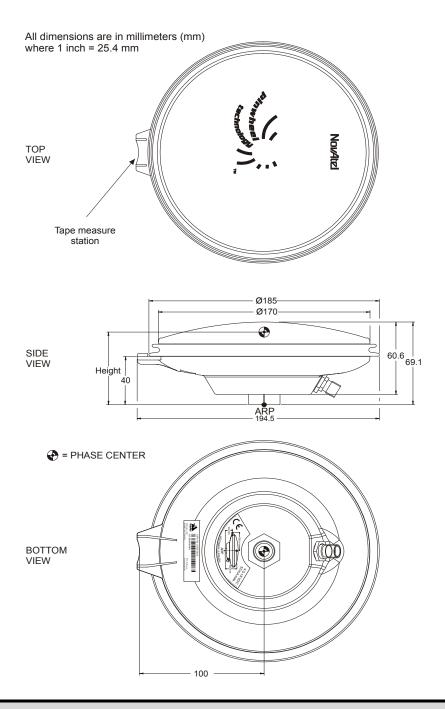

## **ELEVATION GAIN PATTERN**

# **SPECIFICATIONS**

| R                                          | adio Frequency                                              |
|--------------------------------------------|-------------------------------------------------------------|
| 3 dB pass band (typical)                   | L1/E1/B1: 1580.0 ± 28.5 MHz (typical)                       |
|                                            | L2//L3/L5/B2/E5/E5a/E5b:1210.0 ± 45.0 MHz (typical)         |

# **MECHANICAL DRAWINGS**

Height = Vertical phase center offset from antenna reference point or antenna reference plane (ARP)

Refer to the *Mechanical Drawings* on the previous panel and the close-up of the label below before reading this section.

Only integer hardware revisions affect the phase center offsets. For example, the numbers given for hardware revision 2.02 are applicable to an antenna labeled H/W Rev: 2.00, 2.04, 2.12 and so on.

## WARRANTY POLICY

NovAtel Inc. warrants that its Global Navigation Satellite System (GNSS) products are free from defects in materials and workmanship, subject to the conditions set forth below, for the following time periods:

GPSAntenna™ Modules: One (1) Year

Cables and Accessories: Ninety (90) Days

Date of sale shall mean the date of the invoice to the original customer for the product. NovAtel's responsibility respecting this warranty is limited solely to product repair at an authorized NovAtel location only. Determination of repair will be made by NovAtel personnel or by technical personnel expressly authorized by NovAtel for this purpose.

The foregoing warranties do not extend to

- (i) nonconformities, defects or errors in the products due to accident, abuse, misuse or negligent use of the products or use in other than a normal and customary manner, environmental conditions not conforming to NovAtel's specifications, or failure to follow prescribed installation, operating and maintenance procedures,
- ii) defects, errors or nonconformities in the products due to modifications, alterations, additions or changes not made in accordance with NovAtel's specifications or authorized by NovAtel,
- (iii) normal wear and tear,
- (iv) damage cause by force of nature or act of any third person,
- (v) shipping damage; or
- (vi) service or repair of product by the dealer without prior written consent from NovAtel.

In addition, the foregoing warranties shall not apply to products designated by NovAtel as beta site test samples, experimental, developmental, preproduction, sample, incomplete or out of specification products or to returned products if the original identification marks have been removed or altered.

The warranties and remedies are exclusive and all other warranties, express or implied, written or oral, including the implied warranties of merchantability or fitness for any particular purpose are excluded.

NovAtel shall not be liable for any loss, damage or expense arising directly or indirectly out of the purchase, installation, operation, use or licensing or products or services. In no event shall NovAtel be liable for special, indirect, incidental or consequential damages of any kind or nature due to any cause.

There are no user-serviceable parts in the GNSS Antenna and no maintenance is required. If the unit is faulty, replace with another unit and return the faulty unit to NovAtel Inc. You must obtain a RETURN MATERIAL AUTHORIZATION (RMA) number by calling NovAtel Customer Service at 1-800-NOVATEL (U.S. and Canada only) or 403-295-4900 before shipping any product to NovAtel or a dealer. You may also contact NovAtel Customer Service by email at support@novatel.com. Once you have obtained an RMA number, you will be advised of proper shipping procedures to return any defective product. When returning any product to NovAtel, return the defective product in the original packaging to avoid damage.

## **WEEE NOTICE**

If you purchased your GPS-703-GGG-HV or GPS-703-GGG-HV-N in Europe, return it to your dealer or supplier at the end of its life. The objectives of the European Community's environment policy are, in particular, to preserve, protect and improve the quality of the environment, protect human health and utilize natural resources prudently and rationally. Sustainable development advocates the reduction of wasteful consumption of natural resources and the prevention of pollution. Waste electrical and electronic equipment (WEEE) is a regulated area. Where the generation of waste cannot be avoided, it should be reused or recovered for its material or energy. WEEE products may be recognized by their wheeled bin label (X).

## **ROHS NOTICE**

The GPS-703-GGG-HV and GPS-703-GGG-HV-N are compliant with the European Union (EU) Restriction of Hazardous Substances (RoHS) Directive 2011/65/EU.

## PATENT NOTICE

The GPS-703-GGG-HV and GPS-703-GGG-HV-N are manufactured and protected under U.S. Patents #6,445,354 B1, #6,452,560 B2, #6,466,177 B1 and #7,250,916.

## QUESTIONS OR COMMENTS

If you have any questions or comments regarding your GPS-703-GGG-HV or GPS-703-GGG-HV-N antenna, contact NovAtel Customer Service using one of methods provided below.
