

## Base DL Guide

Here is how the system soft case (NovAtel part number 01016687) is intended to be packed:

1. First, the inside:

**Figure 1 Open Soft Case**

Reference	Description
1	Data Logger (NovAtel's DAP 9800 or Husky FS-Series)
2	Tribrach Adapter (NovAtel part number 12023139) & Tribrach (not supplied) *on reverse
3	Battery (NovAtel part number 01016698)
4	Optional Base Radio (Pacific Crest - supplied) *on reverse
5	DL Receiver
6	Quick Release Adaptor (NovAtel part number 70023032)
7	Pacific Crest Antenna Bracket
8	Pacific Crest - Supplied Radio RF Cable
9	Zippered Pouch (may be used to hold small accessories such as a pen, quick disconnect tips (NovAtel part number 80023509), a measuring tape (NovAtel part number 12023140), notebook, etc.)

2. Now, close the case and place the antenna and the RF antenna cable into the pouch at the top of the pack. \*on reverse
3. Close the top pouch using the Velcro strip on the flap and ensure the carrying case is fully closed.

---

---

**Warning:** Do not close flap when operating. Radio transmitter **MUST BE REMOVED** from foam insert to dissipate heat.

---

---

- \* If you are carrying your base equipment to the base site, you may wish to place the base radio and antenna into the soft case as shown in *Figure 1*, *Figure 2* and *Figure 3*. However, if you wish to ship your equipment in the optional system hard case (NovAtel part number 14323029), then fit the soft case into your hard case, remove the base radio from inside the soft case and put it into its own Pelican-supplied case, place your antenna into where the base radio used to be in the soft case and close both cases.
