Enclosures PwrPak7D-E1™

COMPACT DUAL ANTENNA ENCLOSURE DELIVERS NOVATEL'S LEADING SPAN® GNSS+INS TECHNOLOGY

DUAL ANTENNA INPUT

Multi-frequency, dual antenna input allows the PwrPak7D-E1 to harness the power of NovAtel CORRECT® with RTK and ALIGN functionality. This makes the PwrPak7D-E1 ideal for ground, marine or aircraft based systems, providing industry leading GNSS multi-constellation heading and position data in static and dynamic environments.

SPAN: WORLD LEADING GNSS+INS TECHNOLOGY

Synchronous Position, Attitude and Navigation (SPAN) technology brings together two different but complementary technologies: Global Navigation Satellite System (GNSS) positioning and inertial navigation. The absolute accuracy of GNSS positioning and the stability of Inertial Measurement Unit (IMU) gyro and accelerometer measurements are tightly coupled to provide an exceptional 3D navigation solution that is stable and continuously available, even through periods when satellite signals are blocked.

SPAN ENABLED MEMS RECEIVER

The PwrPak7D-E1 contains an Epson G320N MEMS IMU to deliver world class NovAtel® SPAN technology in an integrated, single box solution. This product is commercially exportable and provides an excellent price/performance/size GNSS+INS solution.

FUTURE PROOFED SCALABILITY

Capable of tracking all present and upcoming GNSS constellations and satellite signals, the PwrPak7D-E1 is a robust, high precision receiver that is software upgradeable in the field to provide the custom performance required for your application demands.

The PwrPak7D-E1 has a powerful OEM7® GNSS engine, integrated MEMS IMU, built in Wi-Fi, on board NTRIP client and server support, and 16 GB of internal storage.
