SMART7™

MULTI-FREQUENCY GNSS SMART ANTENNA FEATURING NOVATEL’S POWERFUL OEM7® TECHNOLOGY

MAXIMUM PERFORMANCE
The 555 channel receiver and VEXXIS® antenna inside the SMART7 allow it to receive GPS, GLONASS, BeiDou, Galileo and QZSS signals. Multiple GNSS signals deliver better satellite availability under variable terrain and environmental conditions. The SMART7 also receives L-Band signals providing easy access to the world-wide correction signals provided by TerraStar.

ALIGN
NovAtel® ALIGN® technology is optionally supported when combined with a second SMART7 or NovAtel receiver to provide relative heading and velocity that can be used to guide accessory vehicles. Wi-Fi can also be used to provide a wireless ALIGN solution to simplify communications in implement guiding applications.

TERRAIN COMPENSATION FOR INCREASED ACCURACY
With optional integrated terrain compensation, the SMART7 improves guidance and autosteer performance on uneven terrain and slopes by providing positions corrected automatically for vehicle pitch and roll.

MAXIMUM ACCURACY
The SMART7 can provide a range of performance accuracies from dual-frequency GLIDE® to full centimeter level RTK. TerraStar services provide decimeter or centimeter level accuracy using globally transmitted satellite corrections.

MAXIMUM CONNECTIVITY
The SMART7 supports RS-232 and CAN-bus communications. Optional 2.4 GHz Wi-Fi and 10/100 Ethernet connectivity allows connection to a vehicle’s Wi-Fi network, routers, terminals or other SMART7 antennas.

DURABLE, FIELD-READY DESIGN
This rugged SMART7 antenna is enclosed in a durable, waterproof housing that meets MIL-STD-810G environmental standards for many years of reliable use in the field. Magnetic and screw mounting is supported. Wi-Fi and Ethernet connectivity can also be used to receive RTK or TerraStar corrections over NTRIP.
