

What's New in Data Logger 1.0.0

Initial Release, see manual for details - <https://veripos.com/support/technical-documents/data-logger/data-logger-user-manual>

Product features:

- Extract additional logs from LD900 and LD8 receivers via ICOM ports.
 - Users can select between RINEX, PPP, Interference, and INS logging profiles.
- Receivers can have one ICOM port configured for Data Logger at a time.
- Logs are saved into hourly or half-hourly files, organised into daily folders.
- Intuitive interface shows available storage, file names, logging status, and more.
- Run up to four instances of the application on a single machine.
